DATA SCIENCE SOLUTIONS

Business Accelerators for Data-Driven Enterprises

As businesses witness organic and inorganic expansion, they create an associated data footprint which can be analyzed to point at the bigger picture. Here, systematic data discovery by harnessing the power of Data Sciences enables you to design and develop algorithmic models that help generate value, which can be implemented in the respective business verticals.

Datamatics uses its self-actuating 5D model for data mining, which enables you to Design, Develop & build, Deploy & implement, Discover & analyze your enterprise data, and Deliver value to mitigate risk and optimize existing resources. The company uses its flexible engagement models to suit your business requirements and its dedicated AI/ML innovation center to deliver cost effective solutions.

DATAMATICS CAPABILITIES

Datamatics Data Science team helps you optimize enterprise resources. Some of the key capabilities and include:

Capability augmentation

Offers customized solutions through augmentation of data management capabilities, business domain knowledge, machine learning algorithms, and visualization tools.

Progressive use of AI/ML

Enables you extract knowledge and insights from data for decision making through data-driven actions.

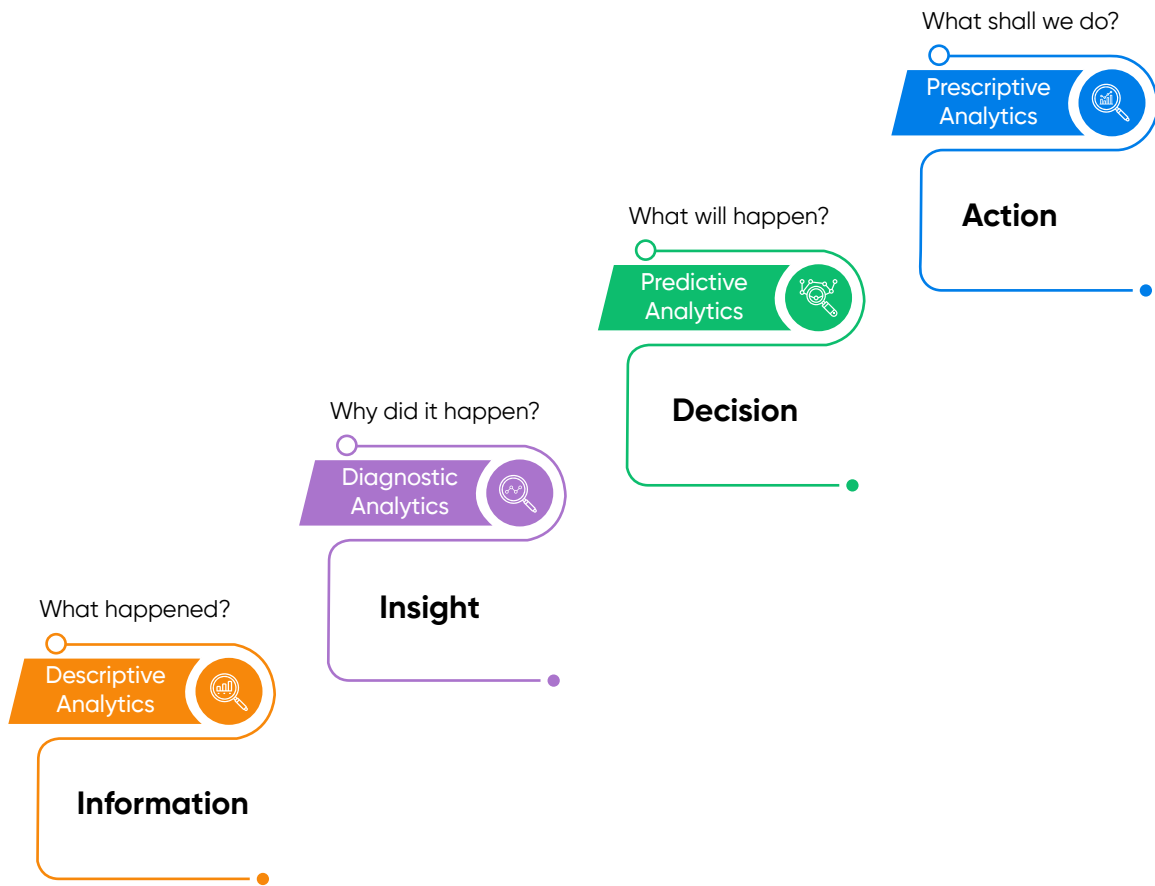

Flexible engagement models

Executes flexible engagements in the form of Resource Augmentation, Project Execution, Dedicated Teams, Extended Delivery Centre, Build-Operate-Transfer (BOT), and Joint Venture.

DATA ANALYTICS APPROACH

KEY DIFFERENTIATORS

Award Winning Use Cases

Cost Effective Solutions

Dedicated AI Innovation Centre

Team of Experienced Data Scientists

Multiple Business Domains Expertise

Flexible Business Engagement Models

DATA SCIENCE USE CASES

Following are some common scenarios, which help you deliver optimum value:

Business Forecasting

Enables you to effectively harness data in order to predict future scenarios and prescribe solutions.

Customer Segmentation

Helps you to auto-segregate your customers into groups based on their unique characteristics so that you can effectively market to each group.

Marketing Mix Model

Helps you to ascertain the effectiveness of each marketing input in terms of Return of Investment, thus tells how much to invest on each marketing input to maximize sales & profits.

Credit Scorecards

Allows you to completely automate the mechanism of assessing the credit-worthiness of business leads based on their historical data.

Sentiment Analysis

Automates the process of identifying and categorizing the sentiment expressed in surveys, online review, social media, etc.

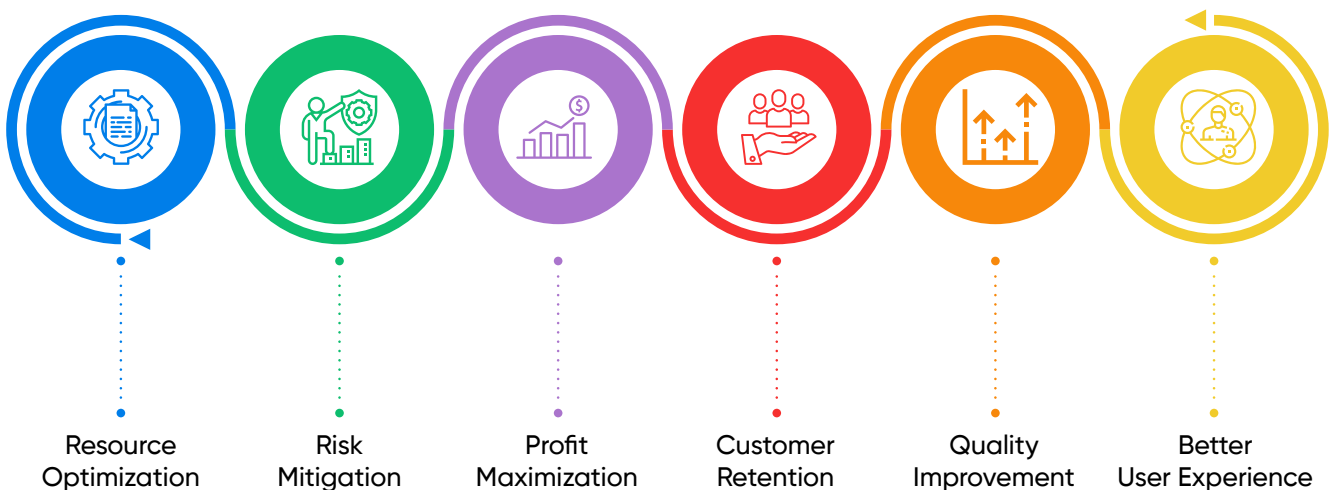

Fraud Detection

Enables you to be up to speed with e-surveillance of fast moving data; for example: banks and financial institutions.
