SOLUTIONS**

# **THE NEXT-GENERATION VISUAL ANALYTICS SOLUTION AT YOUR FINGER TIPS**

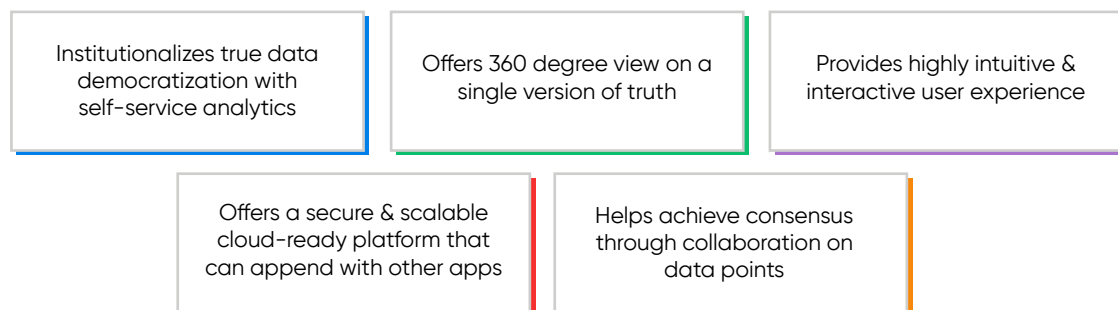

Self-service visual analytics solution for 360-degree view  
of data and predictive analysis

With data in excesses of 2.5 quintillion bytes getting generated every day, enterprises are heralding towards a data glut. In such a scenario, they need the right tools to slice and dice the data in order to get timely insights and arrive at better and faster decisions. Tools that help in performing traditional 5 Whys and Root Cause Analysis using visual reports at the right time and at the right place swiftly and efficiently are becoming business imperatives.

**Datamatics TruBI** is a Business Intelligence and Data Visualization tool that helps enterprises to seamlessly sync with their ERP systems and databases to retrieve business insights using Visual Analytics. It plays a vital role in helping decision makers to combine their acumen and domain experience with high end technologies to gain deeper understanding of complex problems towards making well-informed decisions.

## VALUE PROPOSITION

## KEY FEATURES

**Analytics Workbench** helps users to diagnose what has happened, why has it happened, what will happen in the future, and what action should they take

**Cloud-Ready Architecture** offers a highly scalable platform that helps to process high volumes of data to arrive at business decisions

**Self-Service Pick & Choose Functionality** that allows non-technical business-users to quickly create and personalize dashboards

**Enterprise Grade Reporting** provides a set of productivity tools, report wizards, pre-built templates, and end-user report designers along with **Scheduler** to schedule and publish dashboards

**Enhanced Drill Down & Data Filtering features** help to discover intelligence from huge volumes of data and explore specific KPIs in more detail

**Sharing & Collaboration Feature** allows users to personalize content, customize, and share dashboards with group members during discussions

**Modern & Responsive User Interface** creates interactive dashboards for the web as well as mobile devices for which no coding is required

**Smart Query Builder** allows self-data preparation and query building options without writing any SQL statements

**Data Shaping & Custom Measures** help to perform complex data analysis and shape the data in a user-friendly manner

**Annotations Feature** allows making notes near visual reports while sharing and collaborating with wider teams

# TECHNICAL HIGHLIGHTS

**Highly Scalable Platform** at enterprise level allows self-service analytics using high data volumes for large numbers of concurrent users

**Data Connectors** can connect with different types of data sources and pull out a highly compressed snapshot from the data extract

**Centralized Management Platform** helps in managing small as well as large deployments from a single point over the web

**Hybrid Architecture** enhances performance that enables faster analysis leading to quicker insights

**Enhanced Security Features** provide centralized and customizable role-based security to ensure that stakeholders can only view their own data

**TruBI API** makes it flexible for the dashboards and reports to be extended into other apps and web portals

**Highly Intuitive** such that no specific training is required

DATAMATICS  
**Deep in  
Digital**
