DATAMATICS

INCREASE SPEED-TO-MARKET AND BOOST ROI WITH HYPERAUTOMATION

Hyperautomation, which encompasses the automation of not just manual tasks but also complex business processes, is greatly facilitated by the use of low-code and no-code platforms. By leveraging visual programming interfaces and pre-built components, these platforms accelerate the development of automation solutions.

Datamatics Hyperautomation CoE not only simplifies the development process but also enhances developer productivity, enabling organizations to implement automation at a much faster pace. Datamatics works with market leading LCNC platforms like Outsystems, Microsoft Power Apps & Crowdbotics and enables small, medium & large enterprises to accelerate application development.

MICROSOFT POWER PLATFORM

Elevate the agility of your organization through the accelerated development of AI-infused low-code applications using Microsoft Power Apps. By harnessing the power of AI within the low-code framework of Microsoft Power Apps, you can empower your teams to innovate and transform their workflows at an unprecedented pace. With 20+ Power Platform projects executed and 300+ automated workflows, Datamatics Microsoft CoE works synchronously with clients to institutionalize for building native AI applications.

Power Suite

Power Apps

Power Automate

Power Virtual Agent

Power BI

Why Microsoft Power Platform

10X faster app development

20% reduced delivery timelines

75% reduced security incidents

130+ implemented processes across 5 domains

30% reduction in data management with Power BI dashboard

Service Offerings

- Consulting
- Workflow & Process Automations
- Visualization & Analytics
- Customization & Integration
- Support & Maintenance
- Quality Assurance

- Data & Services Connectors
- Integration with Microsoft, Google, Salesforce, X, Oracle, Facebook & Amazon
- SAP Integration for Order Placement, Invoice Processing & Procurement
- Chatbot Integration for HR & Marketing Functions

OUTSYSTEMS

Outsystems is a modern AI-driven low code application platform that unites design, code and deployment into a single system that radically simplifies the process of creating business-critical software while keeping it always-on and always up-to-date. Datamatics Outsystems CoE has LCNC professionals such as architects, designers, developers, testers etc. who can help you accelerate application development and customize your application based on your unique business needs.

Why OutSystems

Auto scalability

70% increased efficiency with automation

Can work offline or with poor network conditions

Security

Service Offerings

- Seamless Integration
- UX Design
- Automation Testing
- Web & Mobile Development
- Business Process Automation
- Cloud Deployment
- Data Visualization

CROWDBOTICS

Crowdbotics is an AI-driven CodeOps platform that puts new business possibilities within reach by redefining the cost and time curves of software development. CodeOps can help you unlock a new level of development efficiency through safe reuse of extensible modules of code. Crowdbotics makes code reuse and modular software development systemic. The Crowdbotics delivery experience is designed to help clients discover and prioritize high-impact opportunities for digital transformation and innovation.

Why Crowdbotics

Increased efficiency

Build apps upto 66% faster

Auditability

Scalability

Security

Service Offerings

- Continuous Discovery
- Agile Development
- Variable Scope
- Platform Enablement

Support & Maintenance Services

- Tiered SLA for Defect Fixes or Downtime
- Issue/Defect Resolution
- Escalation Process
- Platform Backup/Restore
- Proactive Monitoring
- Maintenance Releases
