

DATAMATICS

**TRANSFORM
TO PERFORM**

FINANCE & ACCOUNTING

Disruptive markets have been instrumental for change in CFO's role. Finance & Accounting (F&A) functions have to manage larger transactional volumes with leaner teams. They have to optimize cash flows, lower revenue leakages, reduce reconciliation time, improve accuracy in reporting, and deliver better business insights.

The solution to this dilemma is digitization and automation. Datamatics F&A solutions enable CFOs with back-office automation and thus transform to perform. The solutions allow CFOs to be agile in responding to changes in their business environment. These solutions make F&A processes more efficient and compliant.

DATAMATICS F&A CAPABILITIES

\$12 BILLION
