Intelligent automation continuum

Process- and data-driven approaches to automation

Datamatics Intelligent Automation Platform Architecture

D

Get up and running faster with our Unique, Template-Free approach

Our template-free approach reduces set up time by 30% -70% and delivers faster time-to-automation. No need to create and maintain multitudes of document templates that escalate total cost of ownership (TCO) and increase time-to-value.

AI-enabled document capture and processing for a greater degree of automation & accuracy

Pre-built AI/ML capabilities and business rules enable automated verification and validation of data. Continuous learning & improvement based on AI/ML algorithms and user inputs. Cognitive capabilities deliver a greater percentage of straight-through processing (STP) with a higher accuracy, thereby reducing manual effort and saving time. Multiple OCR engines supported.

Deployment flexibility as per your business requirements

Deploy the IDP solution in the cloud or on-premises as per your business requirements. Cloud deployment ensures infrastructure flexibility and scalability with increasing IT workloads.

Tailor made for Business User persona

TruCap+ with its easy-to-use Configurator and a compelling UX enables business users to quickly achieve document automation. Browser-based access and an intuitive GUI ensures faster document processing.

Seamless integration with TruBot for end-to-end automation

Achieve end-to-end automation by ingesting unstructured data from documents and its conversion to structured data using RPA and IDP in combination, TruCap+ integrates with TruBot and other leading RPA products.

Flexible, tiered pricing based on page volume

Flexible pricing models provide a range of options to choose from depending on your business requirements, be it thousands or millions of documents. Our transparent pricing ensures business value and offers the options to add-on greater page volume(s) if the need arises.

COVID-19 Enterprise Support Program

TruBot Starter Pack including :

- 2 TruBot Designer
- 1 TruBot Cockpit
- 3 Bot licenses
- 1 hour free consulting
- Standard support.

Over 350+ organizations signed up for TruBot ESP; 150 + organizations used it to enable WFH for their employees.

Sample processes & tasks automated :

- Digital KYC/Remote Account Opening
- Delaying Monthly Loan/Mortgage/Credit Card Payments
- SBA Paycheck Protection Program (PPP)
- COVID-19 Claims Adjudication
- Accelerate Patient Diagnosis for COVID-19
- Extension of EMI
- Moratorium period re-calculation
- Order Management for Surge in Online Orders
- Employee Onboarding.

Largest repository of RPA use cases

Over 800 RPA use cases across 13 vertical industries and numerous functions

START YOUR AUTOMATION JOURNEY WITH 800+ RPA TOOL USE CASES

Read about the top automation use cases from different industries and how Robotic Process Automation software is helping to achieve operational excellence and increase customer satisfaction.

**TruBot - New Features &
Updates**

DATAMATICS

Key features from recent TruBot RPA releases

- Cockpit Personal
- CyberArk integration
- Intellisense
- Citrix virtual channel for native recording
- Native recording support for JAVA & JAVA Applet based applications
- Load balancing & Job Prioritization
- Integration with Source control tools like TFS & Git
- TruBot Analytics with ROI Dashboard and various Bot execution insights
- Addition of 250+ components across various categories like SAP, Salesforce, Recorder, MS Office, Google Suite, Database, AWS, Azure, Workato, PDFs, REST & SOAP APIs, Best Captcha etc.

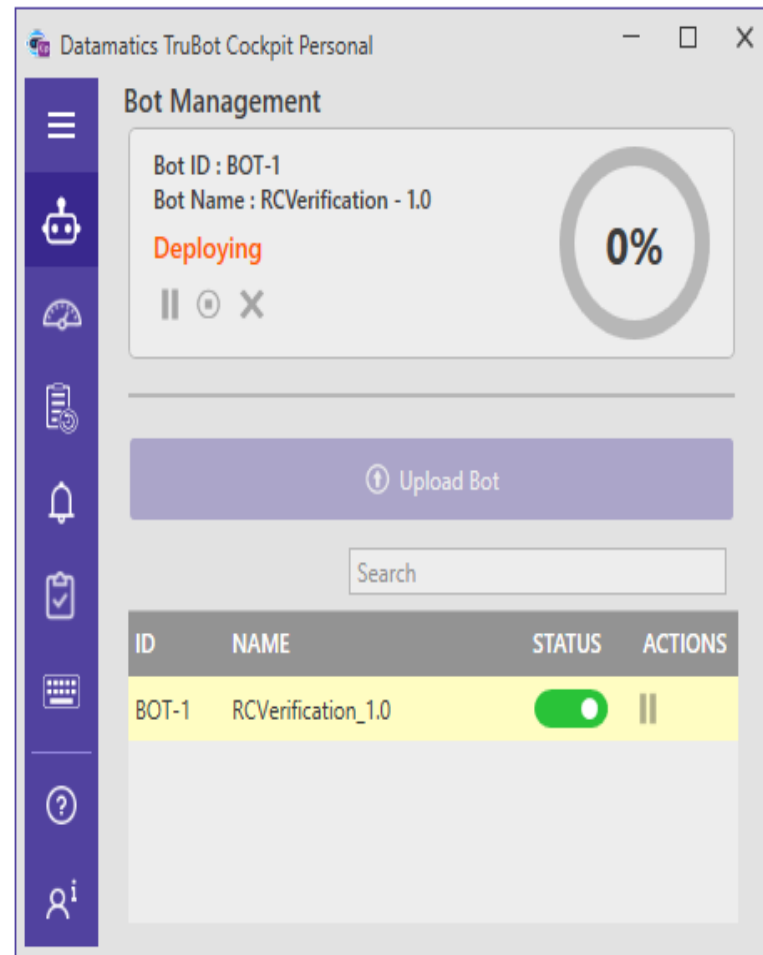

Cockpit Personal - Bot Management

Control your bot from your desktop, democratization of RPA sans the dependency on your IT team

Features & capabilities

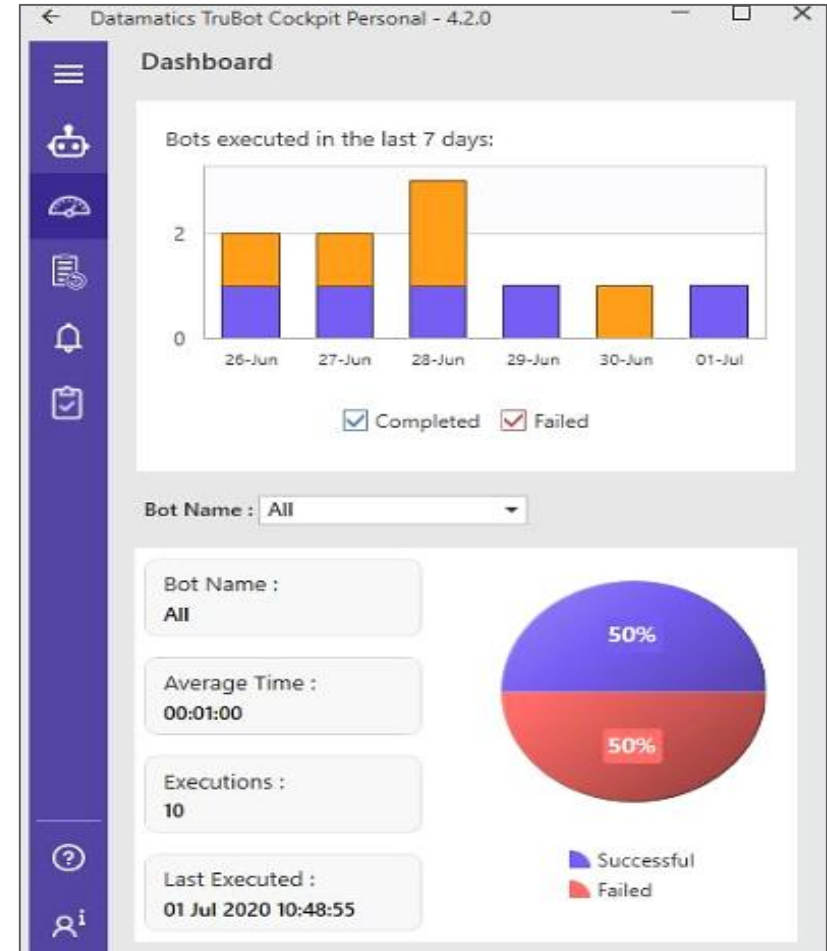

- Upload processes available on the disk
- Immediate creation of bot on upload of process
- Execute Bots with a single click
- Toggle Bot Status between Active & Inactive
- Filter Bots with Bot ID, Name, Version and Status
- Automatic versioning of bots created with the same name

Cockpit Personal - Dashboard

- Day wise Bots executed for last 7 days with segregation between completed & failed bots.
- Analyze execution across all Bots or for a specific Bot
- Maintain logs for 100 days for analysis troubleshooting

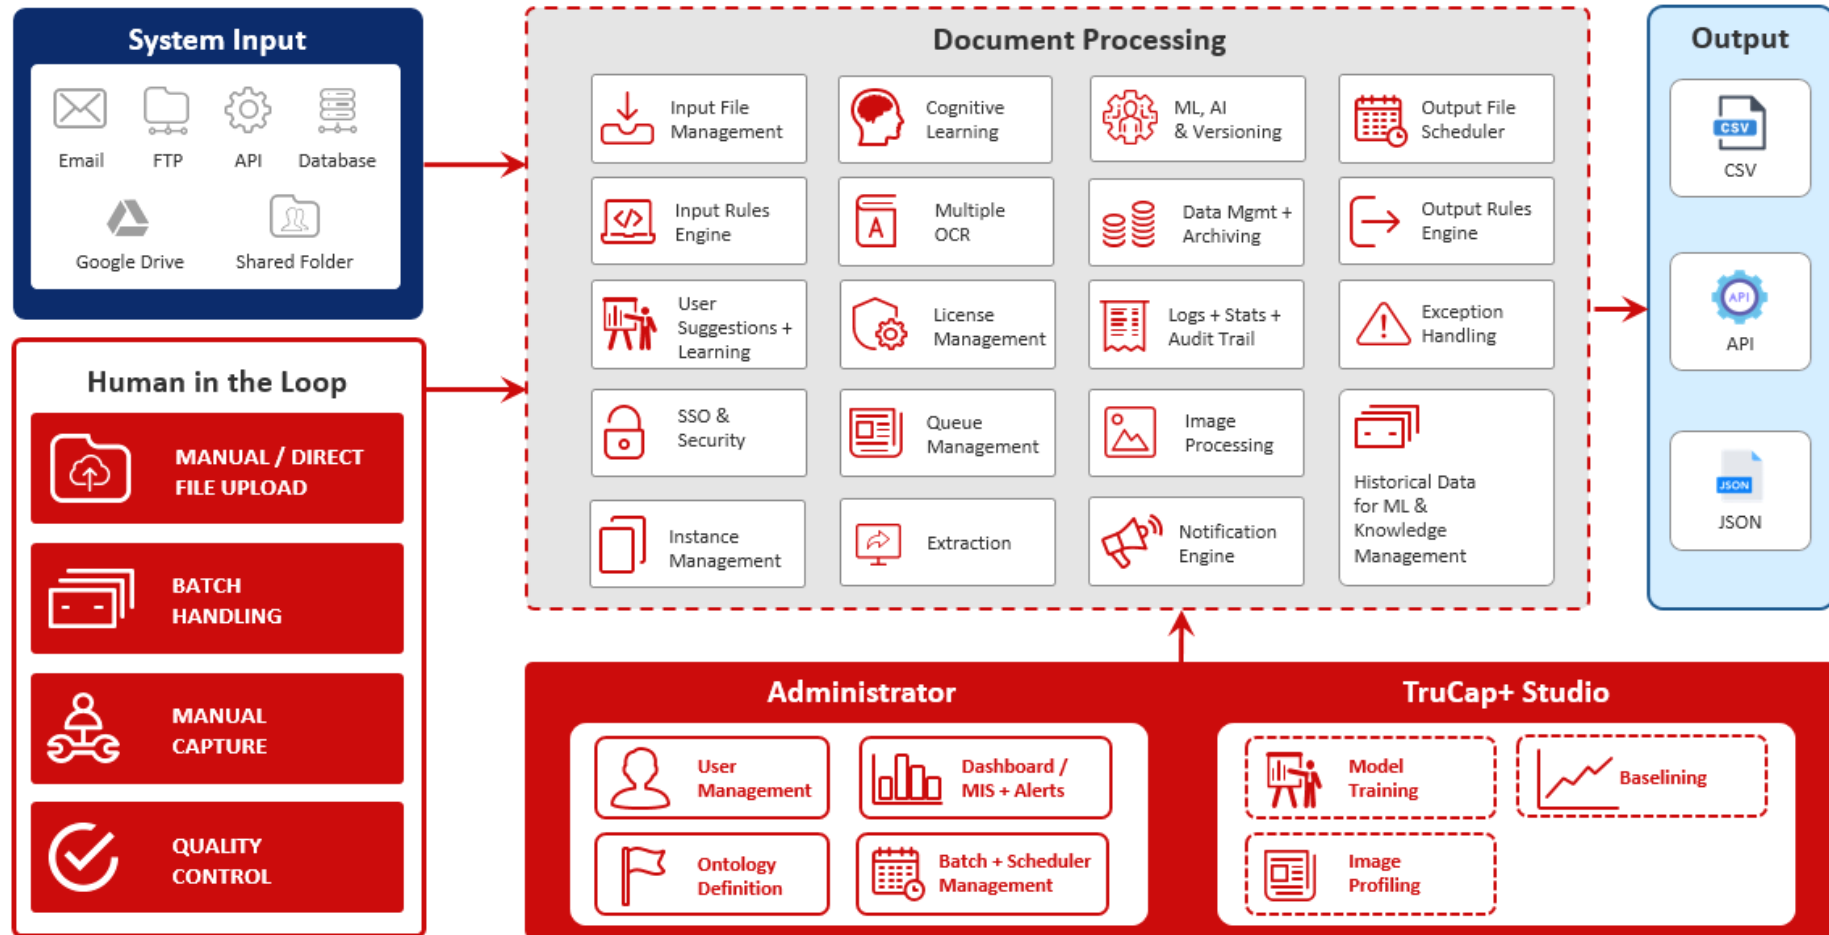

The background of the slide is a solid red color. On the left side, there are several faint, white, concentric circles of varying sizes, creating a ripple effect. The text is positioned in the center of the red area.
