ENTERPRISE CONTENT MANAGEMENT
BUSINESS TRENDS

CIOs have been grappling with challenges associated with the increasingly complex business processes & enterprise content that exists in disparate silos.

Over 85% of all corporate data is unstructured, & growing at over 75% annually.

More than 60% of information in any organization is unavailable when most needed, hindering the organizations ability to take quick decisions & respond to rapidly changing business needs & competitive threats.

Organizations require reductions in turn around time (TAT) information integration of applications & transition to enhance process, productivity & service levels. It is imperative to have the right availability & analysis of requisite data for availing business insights.

DATAMATICS’ NEXT-GENERATION SOLUTION

- Comprises of SOA compatible Smart ECM framework, which integrates consolidation, identification, & categorization of intelligent - information
- Uses Smart tools for seamless integration of knowledge assets with business processes
- Enables unified access to information with integrated data sharing

Proven Track Record
- Executed global multi lingual projects at various industries on diverse technologies

SUCCESS STORY

Client: A leading Power Generation & Trading Corporation spread across the country undertook a program to restructure its Land Records.

Challenge: Content classification, collaborating with several stakeholders & creating a complex Lands Record Management System

Approach: Datamatics jointly with its client conducted a detailed study to understand the process flow, business challenges

Solution: Datamatics offered a composite solution comprising of Documentum based DMS & a closely integrated e-Room. Datamatics implemented the solution in two parallel phases & as a result in a short span of time while the DMS was rolled-out, even e-Room set-up was complete

Benefit: Client is now able to track and manage the records & at the same time senior management is able to collaborate on all issues related to land facilitating faster decision making
