“Our extensive research on various RPA vendors, done as part of ‘The Future of Work and Robotic Process Automation Vendor Assessment 2018 for Asia Pacific (Excluding Japan)’ report suggests that Datamatics effectively leverages its heritage in document processing-related business process services to encode its deep domain expertise into ready-to-use, cognitive-enabled bot offerings such as the TruBot Neuro.

Another interesting differentiator is that a single TruBot can be trained in multiple processes so the same bot can perform different activities at different times, allowing customers to optimize their bot license costs.”
