Lumina Datamatics Limited
Notes to Standalone Financial Statements

Note 1: Significant accounting policies

a) Company Overview

Lumina Datamatics Limited ('the Company') having CIN U22220TN2007PLC065507 was incorporated on November 26, 2007 and is engaged in the business of e-commerce, e-retail and e-publishing services which mainly include editorial services, composition services, media and related services.

b) Significant Accounting Policies

i) Basis of Preparation of Financial Statements:

Compliance with Ind AS

The financial statements comply in all material aspects with Indian Accounting Standards (IndAS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

ii) Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the following:

- * certain financial assets and liabilities (including derivative instruments) which is measured at fair value;
- * defined benefit plans – plan assets measured at fair value

c) Use of Estimates

The preparation of financial statements in conformity with the generally accepted accounting principles require estimates and assumptions to be made that affect the reported amounts of the assets and liabilities on the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Differences between actual results and estimates are recognised in the year in which the results are known / materialized.

d) Foreign currency translation

i) Functional and presentation currency

The financial statements are presented in Indian rupee (INR), which is Company's functional and presentation currency.

ii) Transactions and balances

Transactions in foreign currency are recorded at the rates of exchange prevailing at the date of the transactions.

Monetary items denominated in foreign currencies at the balance sheet date are translated at the exchange rates prevailing at the balance sheet date. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

Any income or expense on account of exchange difference either on settlement or on translation at the balance sheet date is recognised in the Statement of Profit and Loss in the year in which it arises.

e) Revenue recognition

Revenue from technical and software services is recognized on a time and material basis when services are rendered and related costs are incurred. Revenue is recognized when it is earned and no significant uncertainty exists as to its ultimate realization or collection

Effective April 1, 2018, the Company has applied Ind AS 115 which establishes comprehensive framework for determining whether, how much and when revenue is to be recognised. Ind AS 115 replaces Ind AS 18 Revenue and Ind AS 11 Construction Contracts. The Company has adopted Ind AS 115 using the cumulative effect method. The effect of initially applying this standard is recognised at the date of initial application (i.e. April 1, 2018). The standard is applied retrospectively only to the contracts that are not completed as at the date of initial application and the comparative information in the statement of profit and loss is not restated - i.e. the comparative information continues to be reported under Ind AS 18 and Ind AS 11. The impact of the adoption of the standard on the financial statements of the Company is insignificant.

Dividend income is accounted for when the right to receive is established. Interest income is accounted on accrual basis.

f) Income tax

Tax expense comprise of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act.

Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

At each balance sheet date unrecognized deferred tax assets are re-assessed. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Minimum Alternate Tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that normal income tax will be paid during the specified period. In the year in which the MAT credit becomes eligible to be recognized as an asset in accordance with the Guidance Note on Accounting for credit available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of a credit to the Statement of Profit and Loss and shown as MAT Credit Entitlement.

Lumina Datamatics Limited
Notes to Standalone Financial Statements

g) Leases

As a lessee

Lease under which the Company assumes substantially all the risks and rewards of ownership are classified as Finance Leases. The leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased items, are classified as operating lease. Operating lease payments are recognised as expenses in the Statement of Profit and Loss.

h) Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into cash and have original maturities of three months or less from date of purchase to be cash equivalents.

i) Cash Flow Statement

Cash flows are reported using the indirect method, whereby net profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

j) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

k) Inventories

Inventory, if any, is valued at cost (arrived on FIFO basis) or net realizable value, whichever is lower. Custom Duty on the goods where title has passed to the Company is included in the value of inventory.

l) Investments and other financial assets

i) Classification

The company classifies its financial assets in the following measurement categories:

* those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and

* those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

The company reclassifies debt investments when and only when its business model for managing those assets changes.

ii) Measurement

At initial recognition, the company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments

Subsequent measurement of debt instruments depends on the company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

* **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

* **Fair value through other comprehensive income (FVOCI):** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in other income using the effective interest rate method.

* **Fair value through profit or loss:** Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

Equity instruments

The company subsequently measures all equity investments at fair value (except investment in joint venture and subsidiaries which is valued at amortised cost). Where the company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in profit or loss as other income when the company's right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognised in other gain/(losses) in the statement of profit and loss. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

Lumina Datamatics Limited
Notes to Standalone Financial Statements

iii) Impairment of financial assets

The company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Note 29 details how the company determines whether there has been a significant increase in credit risk.

For trade receivables only, the company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

iv) Derecognition of financial assets

A financial asset is derecognised only when

* The company has transferred the rights to receive cash flows from the financial asset or

* retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the company has not retained control of the financial asset. Where the company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

m) Income recognition

Interest income

Interest income from debt instruments is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

Dividends

Dividends are recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the company, and the amount of the dividend can be measured reliably.

n) Derivatives and hedging activities

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain firm commitments and forecasted transactions. Such forward contracts are utilised against the inflow of funds under firm commitments. The Company does not use the forward contract for speculative purposes. The Company designates these hedging instruments as cash flow hedge. The use of hedging instruments is governed by the Company's policies approved by the Board of Directors, which provide written principles on the use of such financial derivatives consistent with the Company's risk management strategy.

Hedging instruments are initially measured at fair value and are remeasured at subsequent reporting dates. Changes in the fair value of these derivatives that are designated and effective as hedges of future cash flows are recognised directly in OCI and the ineffective portion is recognised immediately in the Statement of Profit and Loss.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the Statement of Profit and Loss as they arise.

The fair value of derivative financial instruments is determined based on observable market inputs including currency spot and forward rates, yield curves, currency volatility etc.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated or exercised or no longer qualifies for hedge accounting. At that time for forecasted transactions, any cumulative gain or loss on the hedging instrument recognised in OCI is retained until the forecasted transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in Shareholders' Funds is transferred to the Statement of Profit and Loss for the year.

o) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

Lumina Datamatics Limited
Notes to Standalone Financial Statements

p) Property, plant and equipment

Property, plant and equipments are valued at cost after reducing accumulated depreciation until the date of the balance sheet. Direct costs are capitalised until the assets are ready to use and include financing costs relating to any specific borrowing attributable to the acquisition of fixed assets. Intangible assets are recognised, only if it is probable that the future economic benefits that are attributable to the assets will flow to the enterprise and the cost of the assets can be measured reliably. Capital work-in-progress includes assets not put to use before the year end.

Depreciation methods, estimated useful lives and residual value

Depreciation on property, plant and equipment is provided on the Straight Line Method as per the useful life and in the manner prescribed in Schedule II to Companies Act, 2013.

q) Intangible Assets

i) Computer software

The intangible assets are recorded at cost and are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Directly attributable costs that are capitalised as part of the software include employee costs and an appropriate portion of relevant overheads.

Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is available for use.

ii) Amortisation methods and periods

The company amortises intangible assets with a finite useful life using the straight-line method over a period of 3 years.

iii) Transition to Ind AS

On transition to Ind AS, the company has elected to continue with the carrying value of all of intangible assets recognised as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

r) Trade and other payables

These amounts represent liabilities for goods and services provided to the company prior to the end of financial year which are unpaid. The amounts are unsecured. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

s) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other gains/(losses).

Where the terms of a financial liability are renegotiated and the entity issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognised in profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instruments issued.

Borrowings are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

t) Borrowing costs

Borrowing costs, which are directly attributable to the acquisition, construction or production of a qualifying assets are capitalised as a part of the cost of the assets. Other borrowing costs are recognised as expenses in the year in which they are incurred.

u) Provision, Contingent Liabilities and Contingent Assets

The Company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for contingent liability is made when there is possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect current best estimates.

Contingent Assets are neither recognised nor disclosed.

Lumina Datamatics Limited
Notes to Standalone Financial Statements

v) Employee benefits

i) Defined Contribution Plan

Contribution to defined contribution plans are recognised as expense in the Statement of Profit and Loss, as they are incurred.

ii) Defined Benefit Plan

Company's liabilities towards gratuity and leave encashment are determined using the projected unit credit method as at Balance Sheet date. Actuarial gains / losses are recognised immediately in the Statement of Profit and Loss. Long-term compensated absences are provided for based on actuarial valuation.

iii) Restricted Stock Units

Employee Compensation in the form of stock options, granted under LDL RSU Plan 2016 have been charged to Profit & Loss Statement, based on fair value method, over the vesting period.

w) Contributed equity

Equity shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

x) Earnings per share

In determining Earnings per Share, the Company considers the net profit after tax after reducing the preference dividend and tax thereon and includes the post-tax effect of any extra-ordinary items. The number of shares used in computing basic Earnings per Share is the weighted average number of shares outstanding during the period. The number of shares used in computing diluted Earnings per Share comprises the weighted average shares considered for deriving basic Earnings per Share and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares.

i) Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements.

To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

Financial assets and liabilities measured at fair value At 31 March 2019	Level 1	Level 2	Level 3	Total
Financial assets				
Financial Investments at FVPL				
Mutual funds - Growth plan	481	-	-	481
Equity instruments	-	-	150	150
Preference shares	-	-	495	495
Financial Investments at FVOCI				
Fair value of outstanding forward contracts	-	-	335	335
Total financial assets	481	-	980	1,461

(Rs. In Lacs)

Assets and liabilities which are measured at amortised cost At 31 March 2019	Level 1	Level 2	Level 3	Total
Financial assets				
- Equity instruments	-	-	17,712	17,712
Total financial assets	-	-	17,712	17,712
Financial Liabilities				
Preference Share Capital (Liability)	-	-	1,608	1,608
Total financial liabilities	-	-	1,608	1,608

(Rs. In Lacs)

Financial assets and liabilities measured at fair value At 31 March 2018	Level 1	Level 2	Level 3	Total
Financial assets				
Financial Investments at FVPL				
Mutual funds - Growth plan	277	-	-	277
Equity instruments	-	-	150	150
Preference shares	-	-	495	495
Financial Investments at FVOCI				
Fair value of outstanding forward contracts	-	-	243	243
Total financial assets	277	-	888	1,166

(Rs. In Lacs)

Assets and liabilities which are measured at amortised cost At 31 March 2018	Level 1	Level 2	Level 3	Total
Financial assets				
- Equity instruments	-	-	17,616	17,616
Total financial assets	-	-	17,616	17,616
Financial Liabilities				
Preference Share Capital (Liability)	-	-	1,626	1,626
Total financial liabilities	-	-	1,626	1,626

(Rs. In Lacs)

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

There are no transfers between levels 1 and 2 during the year.

ii) Valuation technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

* the use of quoted market prices or dealer quotes for similar instruments

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, contingent consideration and indemnification asset, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.

iii) Valuation processes

The carrying amounts of trade receivables, trade payables, capital creditors and cash and cash equivalents are considered to be the same as their fair values, due to their short-term nature.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.

Lumina Datamatics Limited
Notes to Standalone Financial Statements

Note 26: Financial risk management

The company's activities expose it to market risk, liquidity risk and credit risk. In order to minimise any adverse effects on the financial performance of the company, derivative financial instruments, such as foreign exchange forward contracts are entered to hedge certain foreign currency risk exposures. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.

This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the impact of hedge accounting in the financial statements

Risk	Exposure arising from	Measurement	Management
Credit risk	Cash and cash equivalents, trade receivables and financial assets.	Aging analysis Credit ratings	Diversification of bank deposits, credit limits and letters of credit.
Liquidity risk	Borrowings and Trade payable	Maturity analysis, cash flow forecasts	Availability of committed credit lines and borrowing facilities
Market risk – foreign exchange	Import Payables and Receivables on Indenting services.	Cash flow forecasting Sensitivity analysis	Forward foreign exchange contracts
Market risk – security prices	Investments in equity securities	Sensitivity analysis	Portfolio diversification

The Board provides guiding principles for overall risk management, as well as policies covering specific areas such as credit risk, liquidity risk, and Foreign Exchange Risk effecting business operations. The company's risk management is carried out by the management as per guidelines and policies approved by the Board of Directors.

A) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. Credit risk encompasses the direct risk of default, risk of deterioration of creditworthiness as well as concentration risks. The Company is exposed to credit risk from its operating activities (primarily trade receivables), deposits with banks and loans given.

Credit risk management

The company's credit risk mainly from trade receivables as these are typically unsecured. This credit risk has always been managed through credit approvals, establishing credit limits and continuous monitoring the creditworthiness of customers to whom credit is extended in the normal course of business. The Company estimates the expected credit loss based on past data, available information on public domain and experience. Expected credit losses of financial assets receivable are estimated based on historical data of the Company. The company has provisioning policy for expected credit losses. There is no credit risk in bank deposits which are demand deposits. The credit risk is minimum in case of entity to whom loan has been given.

The maximum exposure to credit risk as at 31 March 2019 and 31 March 2018 is the carrying value of such trade receivables as shown in note 8 of the financials.
 Reconciliation of loss allowance provision – Trade receivables

Particulars	(Ru. In Lacs)
Loss allowance on 31 March 2017	437.18
Changes in loss allowance	(294.81)
Loss allowance on 31 March 2018	142.37
Changes in loss allowance	0.00
Loss allowance on 31 March 2019	142.37

Lumina Datamatics Limited
Notes to Standalone Financial Statements

B) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the company's liquidity position and cash and cash equivalents on the basis of expected cash flows. In addition, the company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

C) Market risk

i) Foreign currency risk

The company operates internationally and is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the USD, EUR and GBP. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the company's functional currency (INR). The risk is measured through a forecast of highly probable foreign currency cash flows. The objective of the hedges is to minimise the volatility of the INR cash flows of highly probable forecast transactions.

The company's risk management policy is to hedge around 50% to 70% of forecasted receivables for the subsequent 18 months. As per the risk management policy, foreign exchange forward contracts are taken to hedge round 50% to 70% of the forecasted receivables.

a) Foreign currency risk exposure:

Details of foreign currency exposures not covered by derivative instruments as at March 31, 2019 and March 31, 2018 are given below :

Particulars	Currency	Mar-19		Mar-18	
		Foreign Currency	Indian Rupees ` (in lacs)	Foreign Currency	Indian Rupees ` (in lacs)
Receivables	USD	20,82,243.84	1,456.03	11,80,399.53	769.27
	EUR	3,07,111.65	245.94	2,12,100.89	171.38
	GBP	1,04,410.68	94.39	1,73,562.49	160.15
Payables	AUD	33,293.00	16.80	8,810.40	4.40
	SGD	4,541.00	2.35		
	USD	1,292.07	0.92	34,336.28	22.38
	EUR	1.90	0.00		
	AED	-	-	2,928.12	0.52
	GBP	-	-	6,100.00	5.63

Lumina Datamatics Limited
Notes to Standalone Financial Statements

b) Sensitivity

The Company is mainly exposed to changes in USD and Euro. The sensitivity analysis demonstrate a reasonably possible change in USD and Euro exchange rates, with all other variables held constant. 5% appreciation/depreciation of USD and Euro with respect to functional currency of the company will have impact of following (decrease)/increase in Profit & vice versa.

Particulars	(Rs. In Lacs)	
	31 March 2019	31 March 2018
USD	72.76	37.34
AUD	0.84	0.22
SGD	0.12	-
AED	-	0.03
GBP	4.72	7.73
EUR	12.30	8.57

* Holding all other variables constant

ii) Cash flow and fair value interest rate risk

The company's main interest rate risk arises from long-term borrowings with variable rates, which expose the company to cash flow interest rate risk. company policy is to maintain most of its borrowings at fixed rate using interest rate swaps to achieve this when necessary. During 31 March 2019 and 31 March 2018, the company's borrowings at variable rate were mainly denominated in INR and USD.

The company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

a) Interest rate risk exposure

The Company doesnot have any borrowing as at March 31, 2019 and March 31, 2018 hence there is no interest rate risk exposure

iii) Price risk

a) Exposure

The company's exposure to equity securities price risk arises from investments held by the company and classified in the balance sheet either as fair value through OCI or at fair value through profit or loss.

To manage its price risk arising from investments in equity securities, the company diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the company. All of the company's equity investments are publicly traded.

Note 27: Capital management

a) Risk management

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders. The primary objective of the Company capital management is to maximise the shareholder value.

Net Debts include Liability portion of Preference shares as well as current and non current borrowings.

Equity includes equity portion of preference shares

	(Rs. In Lacs)	
	31 March 2019	31 March 2018
Borrowings	1,607.72	1,626.16
Total equity	21,124.51	19,770.12
Borrowing to equity ratio	0.08	0.08

The Company has granted "Restricted Stock Units" under "LDL RSU PLAN 2016" The plan shall extend to Senior Executive employees as identified by the Board/ Nomination and Remuneration Committee, being the permanent employees of the Company including its Subsidiaries and its directors. RSU shall vest at the end of 3 years from the date of grant and based upon satisfaction of the performance criteria. The continuation of employee in the services of the Company shall be the primary requirement of the vesting. Under the LDL RSU PLAN 2016, 432,000 options were granted at exercise price of Rs. 10 per option.

Note 32: Contingent liabilities

A Contingent liabilities

Provision is made in the financial statements if it becomes probable that an outflow of resources embodying economic benefits will be required to settle the obligation.

Contingent Liabilities to the extent not provided for:

Claims against the company not acknowledged as debts

(Rs. In Lacs)

Name of the Statute	Nature of dues	Amount	Financial year	Forum where the dispute is pending
Income tax Act, 1961 (Refer note (a) below)	Income tax	Rs. 39.06 Lacs (Amount Deposited - Nil)	2013-2014 & 2009-10	Income tax Appealant Tribunal Chennai

(a) The Commissioner of Income Tax appeals ("CIT(A)") had on July 20, 2018 passed an order allowing the appeal in favour of the company and has granted partial relief to the company in relation to certain additions laid out below.

However, the Company has filed an appeal in ITAT demanding removal of addition of Rs. 39.06 Lacs for the financial year 2013-2014 and 2009-2010 on account of disallowance u/s. 79 and disallowance u/s. 56 (2) (viib) of the Income tax Act, 1961 respectively.

Based on the professional advice obtained by the company, the management is hopeful of a successful outcome of the appeal and therefore no provision is considered necessary.

Note 33: Commitments

a) Capital commitments

Capital expenditure contracted for at the end of the reporting period but not recognised as liabilities is as follows:

Note 37: Corporate Social Responsibility

As per Section 135 of the Companies Act, 2013, a CSR committee has been formed by the Company. The Company is required to spend ` 17.34 Lacs on the activities specified in Schedule VII of the Companies Act, 2013

Note 38: International and domestic transfer pricing

The Management is of the opinion that its international and domestic transactions are at arm's length as per the independent accountants report for the year ended March 31, 2018. The Management continues to believe that its international transactions and the specified domestic transactions during the current financial year are at arm's length and that the transfer pricing legislation will not have any impact on these financial statements, particularly on amount of tax expense and that of provision for taxation.

Note 39. As per Companies (Accounting Standards) Rules, 2013 issued by the Central Government, in consultation with National Advisory Committee on Accounting Standards ('NACAS') and the relevant provisions of the Companies Act, 2013, to the extent applicable, the carrying value of the asset has been reviewed for impairment of assets and there is no impairment of assets.

Note 40: Micro, Small and Medium Enterprises

In terms of Section 22 of the Micro, Small and Medium Enterprises Development Act 2006, the outstanding to these enterprises are required to be disclosed. However, these enterprises are required to be registered under the Act. In the absence of the information about registration of the enterprises under the above Act, the required information could not be furnished.

Note 41. The Company operates in only one business segment, e-publishing services which mainly include editorial services, composition services, media and related services. All assets, liabilities, revenue and expenses are related to their one-segment activities.

Note 42. The Board of Directors of DATAMATICS GLOBAL SERVICES LIMITED ("DGSL"), and LUMINA DATAMATICS LIMITED ("Lumina") in their respective board meetings on December 14, 2018, approved a proposal to merge the two Companies into DGSL under a Composite Scheme of Arrangement under sections 230-232 of the Companies Act, 2013 ("Scheme"). The business of Lumina Datamatics would then be demerged under the same Scheme from the Company into LDR E-Retail Ltd and would be listed post the demerger. Thus, the shareholders of DGSL will have an identical shareholding pattern in both DGSL and LDR E-Retail Ltd. Post the Board Approval, the Bombay Stock Exchange and the National Stock Exchange have provided their No Adverse Observation Letter on 8 March 2019 and 11 March 2019 respectively.

Lumina Datamatics Limited
Notes to Standalone Financial Statements

Note 43 Previous year figures have been appropriately regrouped/reclassified and rearranged wherever necessary to conform to the current year's presentation.
