

# DATAMATICS

## DATAMATICS LOW-CODE/ NO-CODE PRACTICE

Empowering Businesses to Achieve More with Less Code

Low-Code/No-Code (LCNC) platforms are revolutionizing application development by enabling users to build powerful solutions with minimal or no traditional coding. Using intuitive visual tools like drag-and-drop interfaces and pre-built templates, LCNC significantly reduces development time and complexity, making it accessible to both technical and non-technical users. This approach enables organizations to innovate more quickly, reduce costs, and increase agility in today's competitive business landscape.

At Datamatics, our LCNC Practice is engineered to take this revolution a step further, delivering applications that are not just fast, but also smarter. We leverage a rich library of reusable components and business functions, integrating them with cutting-edge Generative AI capabilities to build intelligent solutions faster than ever before. Everything we do is anchored by a strong governance model, a dedicated Center of Excellence (COE), and an R&D Lab, ensuring your applications are always secure, scalable, and fully compliant. Partner with our dedicated delivery teams and strategic alliances to accelerate your digital transformation journey and confidently achieve operational excellence.

## SERVICE OFFERINGS

### Consulting

- App modernization Strategy and Assessment
- Solution prototyping
- LCNC Governance
- Platform recommendation
- Implementaion Roadmap

### Enterprise Integration & BPM

- Integration of hyper-automation capabilities into LCNC platforms – AI, ML, RPA
- REST, Cloud Services, Enterprise System. Database Integration
- Workflow Automation

### Implementation, Templates & Solutions

- Architecture Services
- AI Assisted Application Development
- Integrations, workflow automations
- Enhanced customer experience
- Out-of-the-box Plugins & Custom Templates & Solutions
- Automation Testing, DevOps
- Visualization & Analytics

### Sustenance Services

- Migration and Version Upgrade
- Application Administration & Support
- Maintenance Activities
- Managed Services

# LCNC ACCELERATORS

## UWP (Insurance Underwriting)

AI-powered underwriting with STP and manual workflows for faster, consistent insurance decisions

## LOS (Loan Origination System)

API-driven onboarding with KYC, credit checks, disbursement, and analytics for smarter lending

## BTL (Book Truck Load)

Quick freight booking with quotes, pickup, e-payments, tracking, and shipment tools without app/system login

## Idea App

PowerApps-based platform for submission of innovative ideas through multi-stage approvals, enriched with versatile dashboards.

## AST (Asset Tracking)

Barcode-based asset tracking app with real-time updates and seamless database integration

## DCC (Dress-code Compliance)

Real-time dress code monitoring via photo analysis with instant alerts for non-compliance

## Testing Automation Framework

DevOps-ready test suite with dashboards, data capture, Jenkins integration, and quality gates

## LCNC FRAMEWORKS

### LCNC Maturity Assessment Framework

Evaluates an organization's LCNC readiness across strategy, tech, talent, and processes, benchmarking current vs. target maturity

### CNC Adoption Framework

Structured approach to scale LCNC covering assessment, platform selection, governance, skills, and pilot rollout

### LCNC Implementation Framework

Guides LCNC rollout with planning, integration, change management, compliance, and continuous improvement

### LCNC Governance Framework

Ensures secure, compliant, and scalable LCNC adoption through a robust governance model

## SUCCESS STORIES

- >> US Manufacturer Improved Onboarding Efficiency by 90%**  
Implemented a cloud-based onboarding solution using OutSystems, automating workflows, integrating with PeopleSoft, and enabling e-signatures with DocuSign resulting in a 90% faster onboarding process.
- >> UK Health Insurer Automated Multi-Life Underwriting**  
Used Power Platform, AI Builder, and InRule to automate medical assessments, enhance user experience, and integrate with claims systems, streamlining multi-life underwriting operations.
- >> Airline Operator Automated 180+ Processes for Faster TAT**  
Digitally transformed operations using Power Automate, SharePoint, and SAP integration, automating over 180 workflows and improving turnaround time across departments.
- >> Logistics Leader Boosted Productivity by 90% with Workflow Automation**  
Automated document workflows using Power Automate and Adobe PDF Services, enabling real-time access to proof of delivery and seamless integration with Adobe Cloud and SharePoint.
- >> US Manufacturer Improved Efficiency by 70% with Automation Testing Services on OutSystems**  
Developed an end-to-end automation framework with regression and sanity packs, integrated dashboards, and continuous testing, thereby boosting testing efficiency by 70% on the OutSystems platform.

DATAMATICS  
**Deep in  
Digital**

## ABOUT DATAMATICS

Datamatics enables enterprises to go Deep in Digital to boost their productivity, customer experience, and competitive advantage. Datamatics' portfolio spans across three pillars of Digital Technologies, Digital Operations, and Digital Experiences. It has established products in Intelligent Document Processing, Robotic Process Automation, AI/ML models, Smart Workflows, Business Intelligence, and

Automatic Fare Collection. Datamatics caters to a diverse global clientele across Banking, Financial Services, Insurance, Healthcare, Manufacturing, International Organizations, and Media & Publishing. The Company has a presence across four continents with significant delivery centers in the USA, India, and the Philippines. To learn more about Datamatics, visit
