BUSINESS ACCELERATORS FOR AGILE ENTERPRISES

## CONTRACT MANAGEMENT SOLUTION

Cloud-based solutions for remote operations

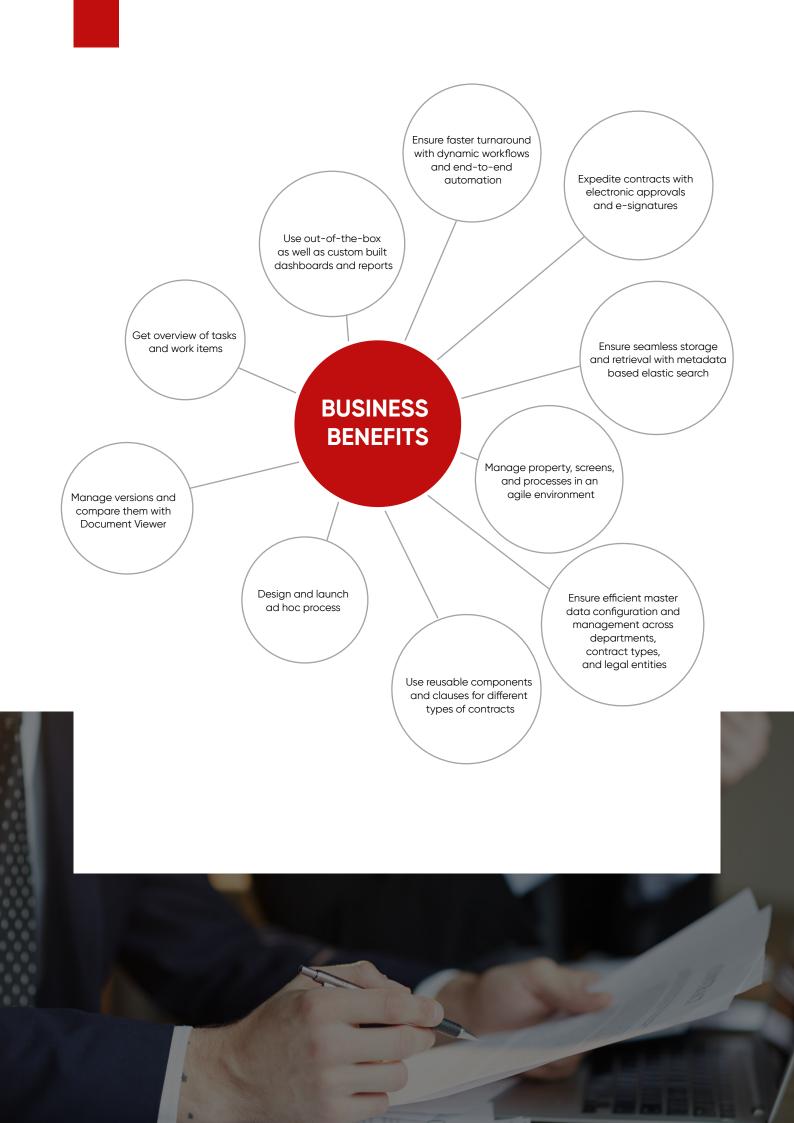

Enterprises work as a part of an extended ecosystem comprising partners, vendors, and customers. Creating crisp contracts on-the-go for concurrently building in flexibility and dependability in these business relationships becomes a mandate for ensuring seamless and continued work alliances. They require a reliable solution for digitally administering comprehensive contracts towards this end.

Datamatics Contract Management Solution is a business accelerator for agile enterprises that enables quick generation of legally binding contracts through a digital platform. With a modular structure to create reusable clauses for different categories, the cloud-based solution enables quick creation and maintenance as well as faster administration of contract documents.

## **FEATURES**

Datamatics Contract Management Solution has plethora of indispensable business features:

- Layered and modular architecture: Offers built in libraries to import as well build standard clauses and templates of legal contracts.
- Built atop IBM Business Automation Workflow: Facilitates business process management as well as case management through an integrated workflow with a 360-degree view of contracts and related work.
- Object-oriented and scalable: Provides a highly extensible digital platform that enables creation of comprehensive contract documents using reusable components.
- Auditing, logging, and notifications: Maintains logs and triggers notifications to support audits in an agile framework.
- **Responsive user interface:** Offers quick UI orientation across standard BYOD devices allowing on the go management of contracts and other deliverables.
- **Web service based integration:** Provides web-based integration with other business systems to facilitate an agile business framework.
- Authentication and authorization: Facilitates multi-factor user authentication for safe and secure
  access across different devices.
- Custom user interface: Provides 100% customizable UI for adapting to different work environments and business requirements.
