TruCap⁺

TruCap⁺

INTELLIGENT DOCUMENT PROCESSING SOLUTION

Enterprises across various industries still use paper as a major source of data input. They require a multitude of employees for manual data entry, which makes document processing a cumbersome, time-consuming, and expensive affair. Automation cannot succeed without digitization and while optical character recognition (OCR) helps with digitization of paper-based information assets, its inherent quality issues are hard to ignore. Intelligent Document Processing (IDP) solution combines OCR, data capture, and AI/ML to automate the retrieval, understanding, and integration of documents required for executing a business process.

Datamatics TruCap⁺ comes with in-built OCR and is also compatible with multiple leading OCRs. It automates data capture and processing via a template-free approach that reduces set up time and provides significantly faster time-to-value than competing IDP products. It is powered by proprietary Artificial Intelligence (AI)/Machine Learning (ML) capabilities enabling it to read unstructured documents, continuously auto-learn, and provide over 99% accurate output. With about 90% of the data received by enterprises being in an unstructured format, Datamatics TruCap⁺ is the ideal solution for your data processing and document automation requirements.

HIGHLIGHTS

AI/ML
powered

99%
accuracy guaranteed

Template free
data capture

Works best with Datamatics TruBot, **integrates** with any other RPA product, teams up well with all downstream systems

38 pre-processing & 30 post-processing functions for **quality output**

300+ Million
documents processed

Operational
analytics & dashboard

FEATURES

Template Free approach

Our context-specific, intelligent data capture and template-free approach reduces setup time and delivers faster time-to-value

Business user friendly

No need for specialized skills, we provide necessary tools and a compelling user experience for business users to quickly achieve document automation

Multi-channel data processing

Processes data from multiple sources, including hard copies and digital data channels; e.g. scanners, FTP, emails, hot folders, etc.

Data validation and auto learning

Auto-verifies and validates data by using business rules and AI/ML algorithms. Continuously learns using AI/ML algorithms and inputs provided by users

High accuracy and STP

Significantly higher accuracy and straight through processing (STP) to reduce manual effort and overall TCO

Deployment flexibility

Deploy in the cloud or a hybrid environment to ensure infrastructure flexibility & scalability and get up and running faster

Automated document classification

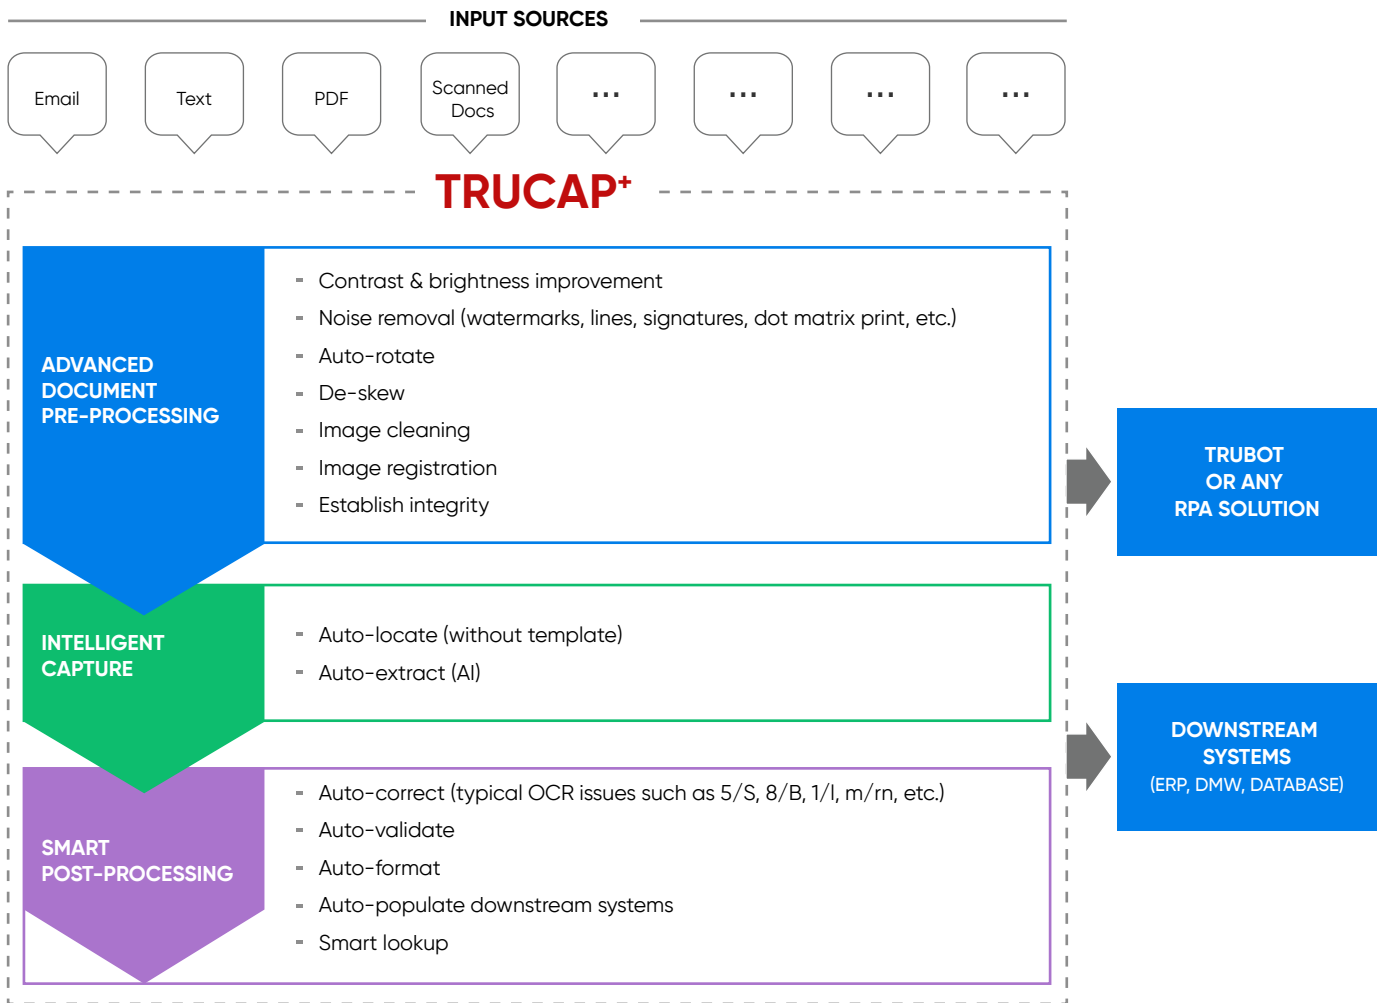

Identifies incoming documents based on content type, then auto-classifies and tags for further processing/extraction.

Integration with TruBot RPA for end-to-end automation

Ingest unstructured data into automation workflows using an IDP and RPA combination

PROCESS ARCHITECTURE

“Datamatics TruCap+ can process all types of documents by understanding the underlying context leveraging its proprietary machine learning capabilities. Clients are highly satisfied with the product support, integration with RPA and other critical systems, and the flexibility to adapt to their business requirements.”

KEY AWARDS & RECOGNITIONS

Datamatics TruBot and TruCap* won Silver and Bronze Awards at the Asia Pacific Stevie Awards

Datamatics TruCap* won People's Choice Stevie Awards at the American Business Awards 2020

Datamatics recognized in the IAOP 2020 Global Outsourcing 100 List of the world's best outsourcing providers

Datamatics TruBot wins Gold Award at the Stevie Awards for Sales & Customer Service 2020

Datamatics wins the Rail Analysis India Award 2020 for Automated Fare Collection technology

Datamatics TruAI wins Gold Stevie Award at the American Business Awards® 2020

ABOUT DATAMATICS

Datamatics provides intelligent solutions for data-driven businesses to increase productivity and enhance the customer experience. With a complete digital approach, Datamatics portfolio spans across Information Technology Services, Business Process Management, Engineering Services and Big Data & Analytics all powered by Artificial Intelligence. It has established products in Robotic Process Automation, Intelligent

Document Processing, Business Intelligence and Automated Fare Collection. Datamatics services global customers across Banking, Financial Services, Insurance, Healthcare, Manufacturing, International Organizations, and Media & Publishing. The Company has presence across 4 continents with major delivery centers in the USA, India, and Philippines. To know more about Datamatics, visit www.datamatics.com
