DATAMATICS MOBILE AND CONTACTLESS TICKETING SOLUTION

Digital solutions for contactless ticketing

Revenue Assurance has always been a daunting task for transit agencies. Without automation, the cash transaction flow from collection to reconciliation often leaves room for improvement. Cash flow automation is the key towards better budgeting, planning and predictability. Besides, the recurrent outbreaks of contagious disease that put the riders, transit personnel, and agencies at risk

mandate minimal contact during transactions. As a case in point, during the COVID-19 pandemic, transit agencies had to suspend fare acceptance from riders and the passenger community to fulfill the statutory mandates that resulted in losing out on a major portion of revenue collection.

Datamatics solution for automated fare collection is now more relevant than ever. The rapidly deployable mobile ticketing provides a contactless solution that is smart, scalable, reliable, customizable, and easy to integrate with the existing infrastructure. Datamatics Mobile and contactless Ticketing offers:

- >> State-of-the-art, future-ready, scalable, and cloud-based mobile and **contactless ticketing solution**
- >> Contactless and cash-free operations confirming to physical and social distancing norms outlined by public health agencies
- >> Limited consumable usage enabling lesser personnel contact
- >> Technology options tailored for small, medium, and large transit agencies as well as transit modes
- >> Rapid deployment with readiness of devices and solution
- >> Solution implementation with limited disruption to existing services
- >> Open framework for forward integration into newer business schemes and partners
- >> Supports multi-channel ticket issuance
- >> Cost effective solutions with convenient and budget-friendly business options

DATAMATICS OFFERINGS
