DATAMATICS

INCREASE BUSINESS AGILITY WITH SALESFORCE DEVOPS SERVICES

INTRODUCTION

DevOps for Salesforce involves a comprehensive strategy that automates the entire lifecycle of changes, from planning to deployment. It breaks down silos between development and operations, promoting collaborative efficiency in managing updates. The goal is to ensure precise, efficient changes that minimize disruptions to users and business processes through streamlined deployment processes and automation. This approach not only optimizes release management but also cultivates a culture of innovation and collaboration within the Salesforce ecosystem.

Why do you need Salesforce Release Management?

End user dilemma

Stakeholder conflicts

Lack of technical governance

Diverse environments

Testing variability

What does Datamatics Offer?

Version Control

Change Management

Development Environment

Testing

Deployment Planning
