TruBot

TRUBOT RPA

START & SCALE YOUR AUTOMATION JOURNEY WITH AI-POWERED TRUBOT RPA

Enterprise-grade, multi-skilled bot programmed to enhance
your enterprise's productivity

TruBot RPA improves enterprise productivity by manifold. It takes the business on the path to better profitability, higher productivity, and a happier workforce.

TruBot RPA is an enterprise-grade Robotic Process Automation solution that automates workloads with high accuracy and minimal human intervention. It frees up the intellectual workforce from repetitive tasks.

TRUBOT RPA – KEY DIFFERENTIATORS

Copilot – Co-create bots from scratch in days and not weeks with Generative AI and reusable components.

Auto-create processes – Leverage smart selection of components, domain-specific and public LLMs.

Natural Language Help – Build Natural Language Help file that engages queries in natural language.

Multi-skilled bot – An enterprise grade, multi-skilled bot which automates a range of simple as well as complex processes.

Ease of use – With Universal recorder and visual workflow, business users can record the activities or drag and drop ready-to-use components to form a fully functional bot in minutes.

Low Code design and development – Library of over 600+ pre-built components enables faster development of automation flows.

Full control of the RPA Program – Through an intuitive dashboard, fully manage and monitor entire bot workforce and get complete insights on bot ecosystem health, all in one place.

Enterprise-grade security – Features like role-based access control and credential vault makes TruBot very secure.

Real-time analytics – Actionable intelligence for business users, visibility into bot operations and KPIs.

UI automation with enterprise applications – Be it automation involving a legacy application or human-bot collaboration, TruBot seamlessly handles complex tasks.

Zero bot footprint – Leaves zero bot footprint on workstations, which ensures workstations are bot-ready quickly.

Gen AI-powered TruPilot – An in-built co-pilot for TruBot seamlessly translates natural language commands into fully-fledged workflows, which, in turn, metamorphose into functional bots within minutes.

COMPONENTS OF TRUBOT RPA ARCHITECTURE

TruBot **DESIGNER**

- With this visual workflow designer, co-create activities, record activities, or drag-and-drop ready-to-use reusable components from the library to form fully functional bots

TruBot **COCKPIT**

- Take complete control of your RPA program with TruBot Cockpit. You can now centrally manage and monitor your bot workforce.

TruBot **STATION**

- TruBot Station is a physical or virtual machine where the bot is deployed. Multiple bots can concurrently run on the same station, thus minimizing the footprint.

TruBot **ANALYTICS**

- TruBot Analytics provides business users with actionable intelligence which can play a crucial role in the success of the RPA program.

ARTIFICIAL INTELLIGENCE AT THE CORE

Face recognition and language analysis services based on AI/ ML technologies of Microsoft Azure Cognitive Service.

Connects with all OpenAI, MS Azure and AWS AI/ML services to create intelligent bots.

Builds bots with natural language commands with Gen AI-powered TruPilot.

Manages bot reviews, audits, enhancements, & maintenance across the entire bot lifecycle with TruPilot.

Offers comprehensive natural language product documentation assistance.

CUSTOMER'S CHOICE FOR ROBOTIC PROCESS AUTOMATION TOOLS

TruBot enjoys high customer satisfaction across industries
