## FINATO PROCURE TO PAY (P2P)

AI-Powered Procurement. Touchless Invoices. Autonomous Finance

Every growing enterprise faces the same procure to pay (P2P) hurdles, delayed approvals, vendor disputes, invoice mismatches, budget overruns, and compliance risks. Finance teams spend more time firefighting operational bottlenecks instead of enabling growth.

But imagine a different reality:

A procurement request raised in minutes, a vendor onboarded digitally with AI checks, contracts auto-compliant, invoices reconciled instantly, and employees reimbursed without delays.

That's the **FINATO P2P journey**, taking you from complexity to clarity, powered by AI and automation.

## Why FINATO for P2P

### AI-Powered

Intelligent P2P automation, smart vendor evaluation, AI/ML-driven invoice capture, and compliance checks.

---

### Automated Workflows

Touchless processing, auto 2/3-way matching, digital vendor onboarding, and smart exception handling.

---

### Real-time Visibility

Dashboards for procurement spend, invoice status, vendor performance, contract compliance, and payment cycle tracking.

---

### Modular & Scalable

Flexible, plug-and-play with any ERP; configurable for industry-specific workflows and multi-entity operations.

---

### Frictionless Collaboration

Vendor self-service portal with digital invoice submission, PO flip, real-time tracking, and seamless communication.

# Key Modules & Capabilities

## Procurement Module

- Automated PR to PO workflow management
- AI enabled vendor evaluation & rating
- Intelligent Contract Management
- Consolidation of PO for better negotiation
- Sourcing Management
- Budget check and warning

## Invoice Processing

- Electronic Invoice processing
- AI/ML enabled auto data extraction
- System based validation/resolution
- Workflow management
- Auto 2/3-way matching
- Seamless Integration with all ERPs
- Auto GL coding

## Vendor Portal

- Automated Vendor Onboarding
- AI enabled Vendor evaluation and shortlisting
- Vendor Information Management
- Digital Invoice Submission
- PO flip feature to create ASN/Invoice
- Invoice Status report

## Contract Management

- Intelligent contract templates
- Pre-approved clause library
- Review, update and sign contracts
- Compare versions
- AI based checks and compliance
- Audit trails

## Travel & Expense

- Create New requests
- Approval workflow
- Manage itinerary - Travel/ticket
- Expense Re-imbursement
- Archival and Storage
- Claims compliance
- Claim advance for travel

System based Alerts & Notifications

Complete Audit Trail

Storage and Retrieval

Secured User based Access

Highly Configurable Platform

# AI Use Cases Across P2P

## AI-Powered Vendor Evaluation

Automatically scores & ranks vendors based on reliability, performance, and risk profile.

## Smart Sourcing Recommendations

Suggests optimal suppliers & consolidation opportunities to maximize savings.

## Invoice Data Capture & Matching

Uses AI/ML to auto-extract data, detect duplicates, and perform 2/3-way matching with near 100% accuracy.

## Dynamic Spend Analytics

Continuously analyzes spend patterns and flags anomalies, fraud risks, or non-compliant purchases.

## Intelligent Contract Compliance

Monitors contract terms, flags deviations, and recommends corrective actions in real-time.

## Predictive Payment Forecasting

Anticipates cash outflows, vendor payment timelines, & working capital requirements using AI models

# Success Story: FINATO P2P in Action

**Client:** World's leading provider of airline catering and provisioning services

**Challenge:** Operating across 200+ airports with thousands of vendors, the client struggled with complex, manual finance processes. Email-based approvals caused delays and inefficiencies, straining vendor relationships. Growing volumes made it hard to maintain accuracy and predict cash flow, highlighting the need for automation.

**The Solution:** Datamatics FINATO centralized and streamlined Accounts Payable and Accounts Receivable operations. FINATO automated invoice processing enabled intelligent approval routing and provided real-time transaction visibility. By leveraging AI for data capture and machine learning for reconciliation, the platform reduced manual effort and errors. Predictive analytics and smart dashboards offered actionable insights, while automation of PO and non-PO invoice approvals eliminated email-based delays, significantly accelerating financial cycles

## Impact:

Improved overall process efficiency by **25%**

Reduced Duplicate payments by **99%**

Invoice TAT reduced from **7 days to 3 days**

Quality improved from **96% to 99.5%**

## Client Speak:

"We collaborated with Datamatics to help process our accounts payable invoices for our customers. I have to say it was transformational; Datamatics has done a great job of recognizing our challenges and enhancing the process."

**Tony McMurray**  
Managing Director, Ingram Micro Global Business Services
