

DATAMATICS

INTELLIGENT AUTOMATION
SOLUTIONS & SERVICES
FOR THE LEGAL INDUSTRY

TRUDISCOVERY FOR LEGAL

Enterprise-grade AI-powered
content assistant for efficient search

Legal firms have huge, physical knowledge repositories and information bases. They are challenging to operate and maintain. It is even more excruciating for legal firms with fewer employees to sustain their data storage and retrieval activities.

TruDiscovery by Datamatics helps executives save up to 50% of their time by eliminating manual searches across their enterprise content libraries. Powered by AI, it enables instant, conversational access to documents, databases, Excel files, websites, portals, and more content sources delivering real-time, accurate insights from across the enterprise.

With Advanced NLP and intelligent search, TruDiscovery transforms information retrieval, boosting productivity, decision-making, and operational efficiency. No more wasted hours, just fast, secure, and precise answers at your fingertips through personalized search.

TRUDISCOVERY FACTS

Conversational User Interface (CUI)

Tailored Prompts

Augment Hybrid Repositories

TRUDISCOVERY ADVANTAGES

Conversational querying: Retrieve enterprise content by talking with the legal repositories in simple English and in a context-sensitive mode.

AI Guardrails: Operate within AI frameworks to promote the safety of content and fairness in operations. Ensure the responsible use of AI across the software application.

Fast and speedy responses: Interact with your legal document knowledge repositories, such as documents, databases, Excel files, websites, portals, and more to retrieve actionable insights.

Faster drafting: Draft legal responses and save time through faster turnaround.

Summarization: Generate summaries of the required document with the click of a button.

TRUDISCOVERY USE CASES FOR LEGAL

Case Management Integration: Access TruDiscovery seamlessly through your case management tools in order to preserve audit trails and case history.

Knowledge repository search: Access specific clauses from the legal repositories when drafting legal cases and responses.

Workplace search: Improve productivity with faster information retrieval across internal repositories and external websites and portals.

Centralized repository search: Conduct an exhaustive search across your databases comprising legal transactional documents, such as contracts, agreements, etc., and court-related documents, such as court orders, judgements, appeals, etc.

Superior Customer Experience: Retrieve the right content the first time. Lead your website visitors, customers, and prospects' searches to the specific content they require.

- **Discover customer intent:** Analyze the customer intent during the conversational engagement with your website. Show your expertise about the customer's requirement at the first engagement.
- **Personalized experience:** Create a relevant experience each time a visitor visits your website.
