

DATAMATICS

AI OFFERINGS

In the AI revolution, there are no neutral zones. You are either pioneering the future with AI, or your competition is. The question is not whether to adopt AI, but whether you will lead the transformation or become its casualty. Many leaders are already using AI, yet struggle with making AI solutions work the best, gain business value & derive ROI.

This is where Datamatics comes up with an AI-First Strategy, which places intelligence at the center of IT and business strategy, helping organizations act faster, make sharper decisions, reduce costs, and discover new growth opportunities.

The impact shows up in many ways through our consulting lead approach, services, right use cases, industry solutions built around specific goals, Accelerators & Products powered by Agentic AI. The results – better customer experience, efficient operations, insights decision making, better risk management, cost reduction and revenue uptick. Behind it all is our centralized AI Centre of Excellence, designed to guide, govern, and scale initiatives to help with enterprise transformation. Datamatics creates AI-driven enterprises that unite people, processes, and trust for lasting growth.

KEY AI SERVICE OFFERINGS

AI Adoption Services

Includes strategy development to implementation and ongoing optimization, we provide end-to-end support harness the full potential of AI or AI Agents for an enterprise.

Agentic AI Enabled Enterprise Automation

Enable process automation across Front office with contact center automation, CIO Office with IT Process Automation and Back Office with operations and insight automation

AI First Digital Transformation Solutions

Enable AI-powered transformation with Legacy Modernization, Data Management & Governance, Advanced Analytics, Cloud Adoption, Intelligent Automation & Testing

AI Managed Services

Monitoring, optimization, governance, and support for AI models, agents, and platforms to ensure security, compliance and high-performance

AI Ecosystem Enablement Services

Enable a robust AI-ready ecosystem effectiveness by optimizing data, security protocols, system integration, and deploying essential tools and platforms.

AI POWERED ACCELERATORS

Our accelerators that enable faster cheaper smarter transformation

Industry Accelerators:

TruAI Underwriting

A multi-agent underwriting solution with autonomous AI agents accelerating the underwriting lifecycle for real-time decision-making

KaiDynamic Pricing

Real-time pricing intelligence driven by demand signals, behavioural data, and AI models, improving margins, conversion rates, and competitive differentiation.

KaiCustomer Insights

AI-driven behavioural and value-based segmentation enabling personalized engagement, targeted marketing, and higher retention and lifetime value

KaiVision

Derive deepen insights with Agentic AI powered video and image analytics

Data & Cloud Accelerators:

KaiData

An intelligent data foundation accelerator combining automated schema discovery, legacy-to-cloud mapping, and end-to-end lineage.

Talk to Data

Enterprise-grade, governed data-on-demand accelerator enabling users to query in natural language while securely converting into compliant, auditable SQL within Copilot.

KaiKM

Centralizes pertinent data, enables better context, for better data annotation, efficient MDM thus helping get faster insights.

KaiAssist

Agentic AI & Generative AI-powered Conversational Accelerator that transforms how enterprises interact with data and processes.

KaiCloud

Assess application portfolios 30% faster, reduce cloud costs by upto 30% and maximize Cloud ROI.

KaiTone

Transform voice data into actionable insights for multilingual transcription, sentiment analysis, and enhanced audio intelligence.

Software Engineering Accelerators

KaiSDLC

Accelerate your software development lifecycle by 50% with Agentic AI

KaiBRE

Modernize & decode complex legacy code 40% faster using Agentic AI

KaiTest

An Agentic AI-powered tool that automates the creation of test plans, cases, and scripts, ensuring speed and precision.

BUSINESS IMPACT

- **A leading North American logistics provider transforms logistics operations** by leveraging Agentic AI powered Vision Analytics for accurate shipment verification process. This solution automated shipment size verification, eliminating manual errors and enhancing billing accuracy. The implementation led to a **98% billing accuracy rate**, significantly reducing revenue leakage and operational inefficiencies
- **For a Leading international private healthcare organization** operating in multiple countries deployed **Agentic AI Underwriting system improving operational efficiency & reducing efforts by 80%**. The multi-agent system helps reduce human interventions in medical questionnaires & underwriting process, extract meaningful insights from data collected & also historical records, aiding the underwriting decision
- **For an international humanitarian organization, enabled 70% faster responses** with an Agentic AI-Powered virtual assistant for migration guidance & support. The assistant acts as an orchestrator by building and maintaining its knowledge base through automated extraction of information from authorized migration websites. Thus, providing migrants with seamless access to verified information, guidance, and resources related to migration processes.
- **A leading global bank** deployed Agentic AI Data Request Copilot - Talk to Data to enable secure, natural-language data access. With zero data exposure and full compliance, it **delivered 60% faster data turnaround., reduced data team workload by 40% and improved accessibility 3X.**
- **A leading U.S. supermarket chain used Datamatics KaiVision - Agentic AI Vision Analytics to turn surveillance into real-time insights.** The solution improved staffing, reduced queues, and enhanced customer experience with up to 90% accuracy.

ABOUT DATAMATICS

Datamatics enables enterprises to go Deep in Digital to boost their productivity, customer experience, and competitive advantage. Datamatics' portfolio spans across three pillars of Digital Technologies, Digital Operations, and Digital Experiences. It has established products in Intelligent Document Processing, Robotic Process Automation, AI/ML models, Smart Workflows, Business Intelligence, and

Datamatics caters to a diverse global clientele across Banking, Financial Services, Insurance, Healthcare, Manufacturing, International Organizations, and Media & Publishing. The Company has a presence across four continents with significant delivery centers in the USA, India, and the Philippines. To learn more about Datamatics, visit www.datamatics.com
