

DATAMATICS

Cloud Assessment Services

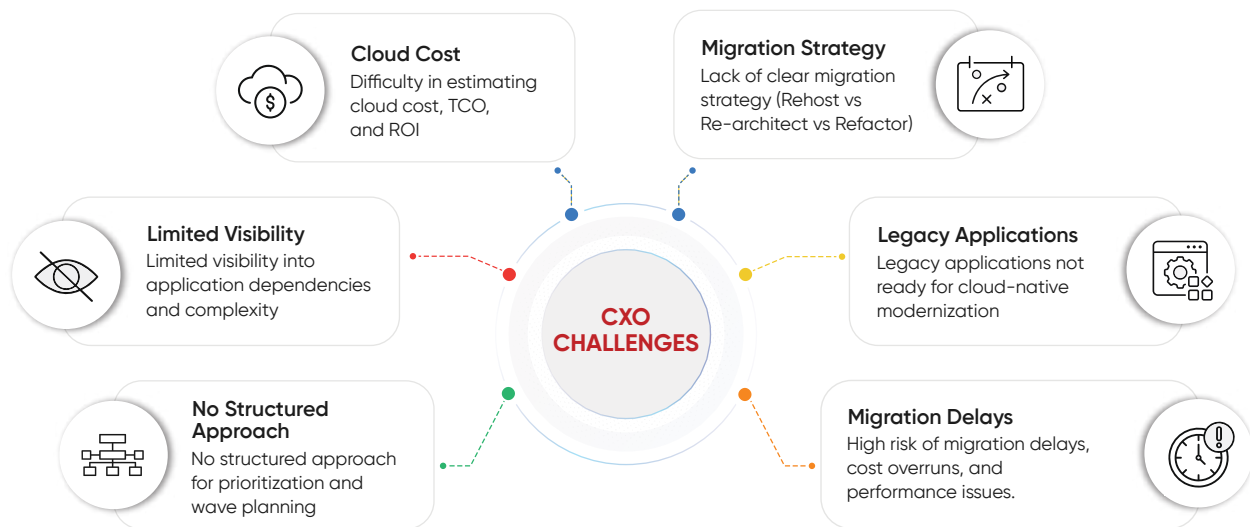

Unlocking Agility Through Seamless Migration & Modernization

In today's digital landscape, cloud migration and modernization are essential to drive agility, innovation, and scalability. However, transitioning complex enterprise environments can be fraught with hidden costs, technical debt, and operational risks, making it critical to assess before you move as the smartest way to de-risk your journey.

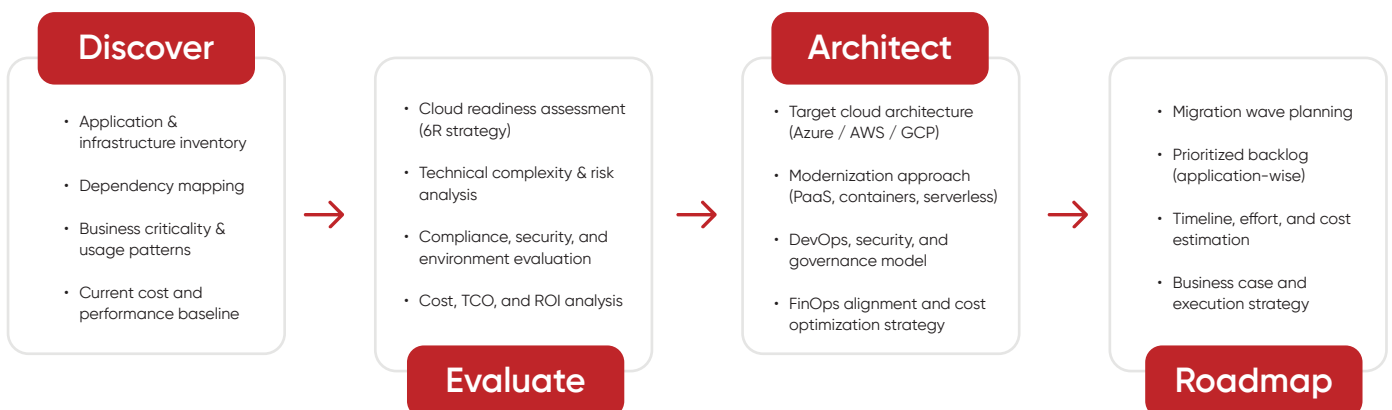

Datamatics helps you navigate this by utilizing a consulting-led approach and our factory-based cloud adoption framework. Our Cloud Adoption Readiness Assessment provides a data-driven evaluation of your existing IT landscape. Powered by AI-driven accelerators, we analyze your workloads to determine cloud readiness, assess feasibility, and uncover high-value modernization opportunities, ensuring a secure, predictable path to your target business outcomes.

Business Challenges Faced by CXOs

Datamatics Solution Framework

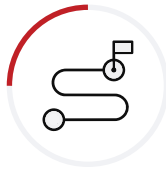

Our DEAR Framework provides a structured, architecture-led approach to accelerate cloud migration and modernization with predictable outcomes

Business Outcomes

30–50% faster migration planning

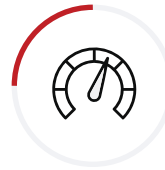

Clear cloud adoption roadmap aligned to business goals

Optimized migration cost and reduced risk

Identification of modernization opportunities (containers, microservices)

Improved application performance and scalability

Key Differentiators: Why Partner With Us ?

01

Proven assessment frameworks and accelerators

02

Strong expertise across Azure, AWS, and GCP ecosystems

03

Integrated approach: Cloud + DevOps + Security + FinOps

04

Focus on business value realization, not just migration

05

Experience with large-scale enterprise transformations

06

Kai Suite of Accelerators powered by Agentic AI

START YOUR CLOUD JOURNEY

Accelerate your cloud journey with a structured, architecture-led roadmap that maximizes value and minimizes risk.
