LEGACY MODERNIZATION SERVICES

Reconstruct. Modernize. **Transform.**

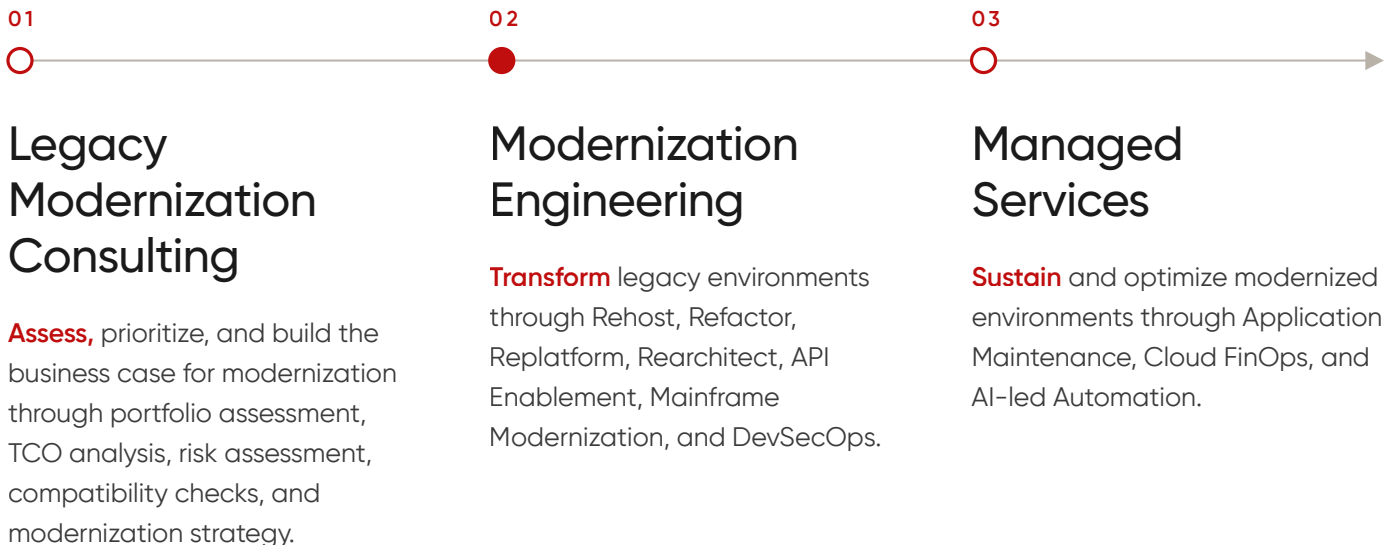

— LEGACY MODERNIZATION SERVICES

Turn legacy complexity into a foundation for **continuous innovation.**

In the AI era, legacy technology can no longer be treated as a maintenance challenge. Monolithic applications, fragmented data, fragile architectures, and shrinking pools of legacy talent limit agility, increase technical debt, and make transformation costly and risky.

Datamatics takes an end-to-end approach to modernization, bringing together AI, Data, Applications, and Cloud to transform the enterprise as a whole, not modernize technology in isolation. We reconstruct the intelligence, business logic, and context embedded in legacy systems; accelerate delivery by up to 3X; reduce risk, technical debt, and modernization costs; and create a holistically modernized, AI-ready enterprise built for continuous innovation.

— LEGACY MODERNIZATION OFFERINGS

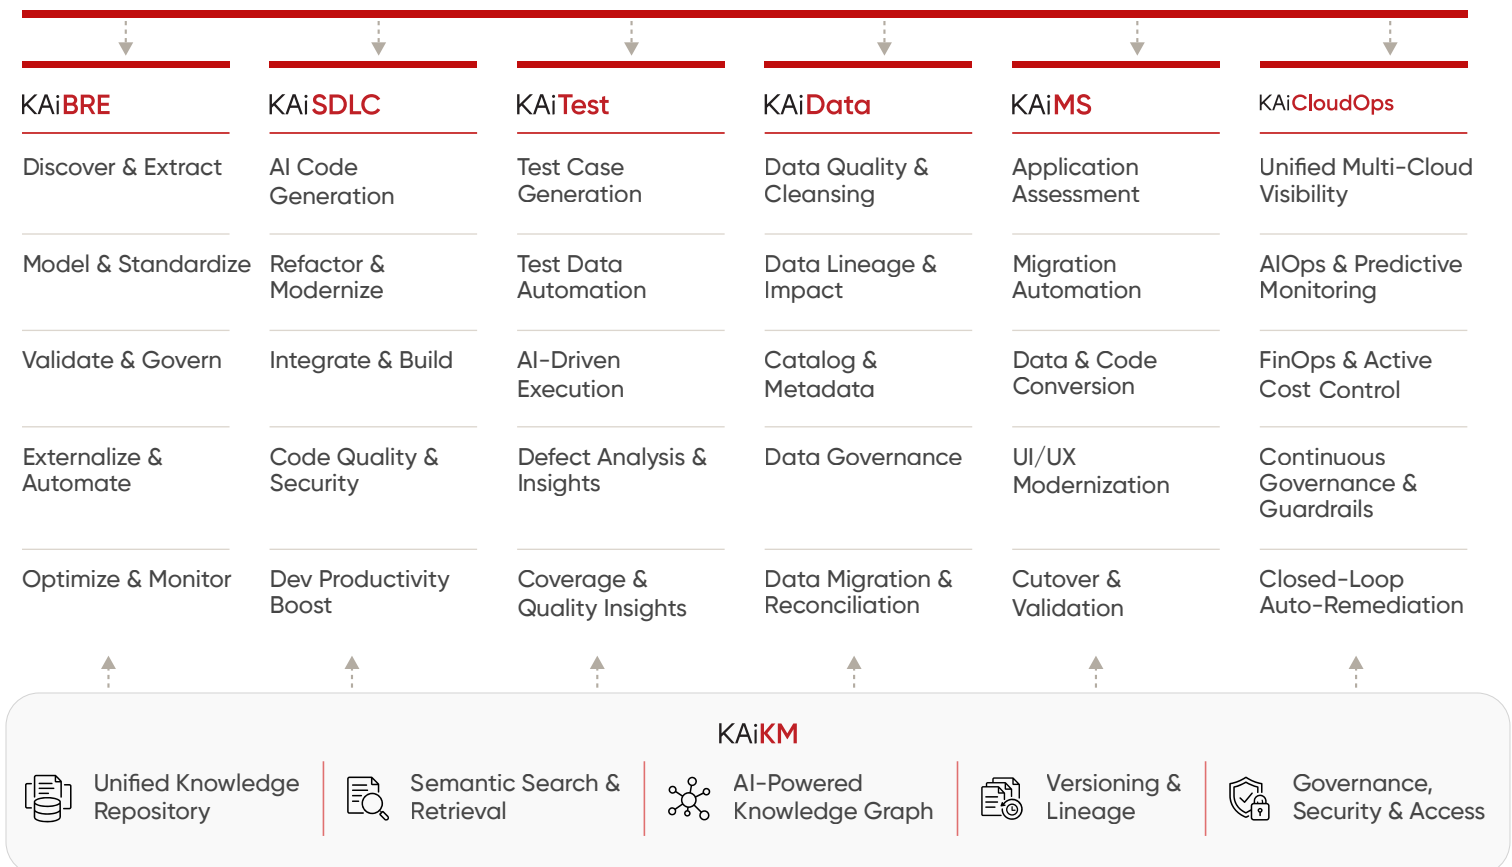

Industrializing Legacy Modernization with AI

KAi Modernization Factory is Datamatics' suite of AI-enabled accelerators that systematically analyze, reconstruct, modernize, test, and migrate legacy systems into scalable, cloud-ready and AI-ready enterprises.

It brings together specialized AI capabilities across the modernization lifecycle to accelerate transformation, preserve business context, and reduce the complexity, cost, and risk of legacy modernization.

MODERNIZATION IN ACTION

01 American Logistics Giant

Customer Onboarding

Modernized a legacy, paper-heavy onboarding process with a cloud-native Azure application integrating AS400 and EDW systems. Achieved **99.6%** application availability with improved scalability and faster onboarding.

02 Health Insurance Company

Quote-to-Buy

Modernized the digital quote-to-buy journey using Sitecore and Azure to simplify customer experiences and improve conversions. Increased online conversions by **20%** and customer stickiness by **30%**.

03 Healthcare Organization

Patient Communication

Built a secure, cloud-based platform connecting ICU patients, families, and care teams through real-time communication. Achieved **99.6%** availability and processed **51.8K** voice messages.

04 U.S. Manufacturer

Employee Onboarding

Replaced fragmented onboarding processes with a cloud-based solution integrating OutSystems and DocuSign. Reduced pre-employment processing time by **90%** and testing effort by **70%**.

05 North American Logistics Provider

Linehaul App

Modernized driver operations with a mobile application enabling real-time dispatch updates and offline access. Reduced cycle time by **40%**, cut IVR wait times by **23%**, and increased uptime by **27%**.

06 NBFC

Cloud Modernization

Migrated critical workloads to the cloud to strengthen resilience, security, and cost efficiency. Reduced Cloud TCO by **20%**, achieved **99.6%** application availability, and improved RTO by **67%**.
